No. 467 (October 13, 20 & 27, 2012)

PUBLIC NOTICE

The Federal Emergency Management Agency (FEMA) hereby gives notice to the public of its intent to reimburse eligible applicants for eligible costs to repair or replace facilities damaged by Hurricane Isaac which occurred August 26, 2012 through September 11, 2012. This notice applies to the Public Assistance (PA), Individual Assistance (IA), and Hazard Mitigation Grant (HMGP) programs implemented under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207.
Under the major disaster declaration FEMA DR-4081-MS, signed by the President on August 29, 2012, and amended on August 30, 2012, September 1, 2012, September 7, 2012, September 11, 2012, and September 28, 2012, the following counties have been designated adversely affected by the disaster and eligible for IA: Adams, Amite, Clarke, Copiah, Franklin, Forrest, George, Hancock, Harrison, Hinds, Jackson, Jefferson, Jones, Lamar, Lincoln, Marion, Pearl River, Pike, Stone, Walthall, Warren, and Wilkinson Counties. Counties eligible for PA include: Adams, Amite, Attala, Carroll, Claiborne, Clarke, Copiah, Covington, Forrest, Franklin, George, Greene, Grenada, Hancock, Harrison, Hinds, Holmes, Jackson, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lamar, Lauderdale, Lawrence, Leake, Lincoln, Madison, Marion, Mississippi Band of Choctaw Indians, Montgomery, Neshoba, Newton, Noxubee, Pearl River, Perry, Pike, Rankin, Scott, Simpson, Smith, Stone, Walthall, Warren, Wayne, Wilkinson, Winston, and Yazoo.. Additional counties may be designated at a later date without further

public notice. The Hazard Mitigation Grant Program (HMGP) is available statewide.
This public notice concerns activities that may affect historic properties, activities that are located in or affect wetland areas or the 100-year floodplain, and critical actions within the 500-year floodplain. Such activities may adversely affect the historic property, floodplain or wetland, or may result in continuing vulnerability to flood damage.
Presidential Executive Orders 11988 and 11990 require all federal actions in or affecting the floodplain or wetlands be reviewed for opportunities to relocate and evaluated for social, economic, historical, environmental, legal, and safety considerations. Where there is no opportunity to relocate, FEMA is required to undertake a detailed review to determine what measures may be taken to minimize future damages. The public is invited to participate in the process of identifying alternatives and analyzing their impacts.
FEMA has determined that there are normally no alternatives to restoration in the floodplain or wetland for certain types of facilities. These are facilities that meet all of the following criteria: 1) FEMA's estimate of the cost of repairs is less than 50 percent of the cost to replace the entire facility and is less than $100,000; 2) the facility is not located in a floodway; 3) the facility has not sustained major structural damage in a previous Presidentially declared flooding disaster or emergency; and 4) the facility is not critical (e.g., the facility is not a hospital, generating plant, emergency operations center, or a facility that contains dangerous materials). FEMA intends to provide assistance for the restoration of these facilities to their pre-disaster condition, except that certain measures to mitigate the effect of future flooding or other hazards may be included in the work. For example, a bridge or culvert restoration may include a larger waterway opening to decrease the risk of future washouts.
For routine activities, this will be the only public notice provided. Other activities, and those involving facilities that do not meet the four criteria, are required to undergo more detailed review, including study of alternate locations. Subsequent public notices regarding such projects will be published, if necessary, as more specific information becomes available.
In many cases, an applicant may have started facility restoration before federal involvement. Even if the facility must undergo detailed review and analysis of alternate locations, FEMA will fund eligible restoration at the original location if the facility is functionally dependent on its floodplain location (e.g., bridges and flood control facilities), or the project facilitates an open space use, or the facility is an integral part of a larger network that is impractical or uneconomical to relocate, such as a road. In such cases, FEMA must also examine the possible effects of not restoring the facility, minimizing floodplain or wetland impacts, and determining both that an overriding public need for the facility clearly outweighs the Executive Order requirements to avoid the floodplain or wetland, and that the site is the only practicable alternative. The State of Mississippi and local officials will confirm to FEMA that proposed actions comply with all applicable state and local floodplain management and wetland protection requirements.
FEMA intends to provide IA program funding for disaster-related emergency housing. These actions may adversely affect a floodplain or wetland, or may result in continuing vulnerability to floods. These actions may include repair, restoration, or construction of housing or private bridges, purchase and placement of travel trailers or manufactured housing units, or repair of structures as minimum protective measures. This will be the only public notice concerning these actions.
FEMA also intends to provide HMGP funding to the State of Mississippi to mitigate future disaster damages. These projects may include construction of new facilities, modification of

existing, undamaged facilities, relocation of facilities out of floodplains, demolition of structures, or other types of projects to mitigate future disaster damages. In the course of developing project proposals, subsequent public notices will be published, if necessary, as more specific information becomes available.
The National Historic Preservation Act requires federal agencies to take into account the effect of their undertakings on historic properties. Those actions or activities affecting buildings, structures, districts or objects 45 years or older or that affect archeological sites or undisturbed ground will require further review to determine if the property is eligible for listing in the National Register of Historic Places (Register). If the property is determined to be eligible for the Register and FEMA's undertaking will adversely affect it, FEMA will provide additional public notices. For historic properties not adversely affected by FEMA's undertaking, this will be the only public notice.
As noted, this may be the only public notice regarding the above-described actions under the PA, IA, and HMGP programs. Interested persons may obtain information about these actions or a specific project by writing to the Federal Emergency Management Agency, Joint Field Office, 502 Clinton Center Drive, Suite 3200, Clinton, MS 39056, or by calling (601) 926-3300. Comments should be sent in writing to Terry Quarles, Federal Coordinating Officer, at the above address within 15 days of the date of this notice.

No. 479 (October 20, 2012)

BEFORE THE STATE OIL AND GAS BOARD OF MISSISSIPPI
RE: APPLICATION OF DENBURY ONSHORE, LLC FOR ADMINISTRATIVE AUTHORITY TO AMEND THE EXISTING TFU 12-11 #2 INJECTION PERMIT TO ADD A LINER IN THE CURRENT WELLBORE IN THE APPROVED CLASS II ENHANCED OIL RECOVERY SALTWATER/CO2 INJECTION WELL TINSLEY FIELD UNIT YAZOO COUNTY, MISSISSIPPI
PUBLIC NOTICE
TO: ALL OWNERS AND PERSONS INTERESTED IN THE TINSLEY FIELD, YAZOO COUNTY MISSISSIPPI:
Take notice that Denbury Onshore, LLC (the “Applicant”) has filed an application with the Mississippi State Oil and Gas Board requesting authority to modify the existing approved Rule 63 on the TFU 12-11 #2 Class II enhanced oil recovery saltwater and/or carbon dioxide injection well in the East Heidelberg Field, Jasper County, Mississippi, (“the Well”).
The location of the well is 2,376 from the west line and 1,615 feet from the north line of Section 12, Township 10 North, Range 3 West, Yazoo County, Mississippi.
Applicant requests authority to amend the existing permit to place a 4" 9.5# FJ liner inside the current wellbore to protect or provide mechanical integrity. The Applicant may also deepen the well, as necessary, to place the liner in the wellbore. The well will be utilized for pressure maintenance and secondary recovery operations on the Field Unit, a compulsory field wide unit in the Tinsley Field.
Applicant’s administrative permit application in this matter is on file in the offices of the Mississippi State Oil and Gas Board located at 500 Greymont Avenue, Suite E, Jackson, Mississippi, where it is available for public inspection during usual business hours.
Any interested persons wishing to submit written comments to the Mississippi State Oil and Gas Board regarding this administrative permit application must do so within twenty (20) days following the publication of this public notice.
Signed this 16 day of October, 2012.
